

Manage your risk!

BEFORE YOU START... Home Renovations

Note: Unsafe electrical practices past and/or current can increase risk of potential shock and fire hazard.

**Electrical
Safety
Authority**

1. Hire a licensed electrical contractor - learn about the electrical requirements in the Ontario Electrical Safety Code, and in your home.

2. Ensure power is off - turn power off from the panel box and confirm it is off at the outlet or switch using a tester. (see www.esasafe.com for information on approved testers)

3. Protect your family and investment - hire a licensed electrical contractor and request a copy of the "**Certificate of Inspection**" from the Electrical Safety Authority - your record electrical work meets Ontario's Safety requirements.
